
LIGHT AND BRILLIANCE

THE ADVENTURE

Life is a dynamic process. It allows us to form our character, build an identity and discover its beauty as we explore. From the starting point at birth, to the end of our earthly life, the reality is that when we part from this world, there are many places we have visited, many locations we have gone to and thereby many incomplete endeavors.

As we are living, we can redirect our steps in a more fulfilling manner towards a different path to complete the journey. We can shift away from the negative to create a vision of something far greater instead of the impossible. Human growth as we set out towards our destination depends on our analysis of:

- **Our decisions**
- **Our standing position-good or bad terrain**
- **Haltered process by self or by others**
- **A mental unforeseeable future**
- **Roadblocks, dead ends, no exit signs, detours**
- **Stagnancy, lost hope, pessimism**
- **Lack of opportunity towards advancement**
- **Environmental contribution**
- **Humanitarian support**
